

Click for Philips Hue

P/N: FOH-DSxx

Included in the package:

- 1 - Dual Rocker Switch
- 1 - Screwless faceplate
- 1 - Single Rocker insert
- 1 - Wire nut for bypassing wired switch
- 1 - Backplate for surface mounting
- 2 - 3/8" Backplate attachment screws
- 2 - 3/4" Junction box mounting screws
- 2 - Command Strips®
- 1 - Installation Guide

Requires: Philips Hue Bridge v2 or newer

Overview

The Click for Philips Hue is a "Friends of Hue" switch that makes Hue lights family and guest friendly. Turn lights on and off in a standard, intuitive way and press and hold for dimming. Once connected to the Bridge V2, Click for Hue may be configured with the Hue App or Apple HomeKit. No battery or external power is needed. Click for Hue is powered by the kinetic energy produced with the click of a button. Dual Rocker inserts offer 4 buttons for control or use the single rocker insert to match standard switches.

Specifications:

Range	30-100 feet (10-30m) typical
Frequency	2.4GHz - ZigBee channels 11-26
Power Supply	Self-generated when switch is pressed
Buttons	4 (2 rockers) or 2 (single rocker)
Dimensions	2.75 (W) x 4.5 (H) x 0.62 (D) inches
Operating Temperature	-13° to 149°F (-25° to 65°C)
Certifications	FCC, IC and CE
Addressing	Factory Set Unique ZigBee ID

Mounting

Always follow local electrical codes when installing this device. Installation should be performed by a qualified professional.

Add the switch to the Hue Bridge V2 before mounting. See instructions on page 2.

After adding the switch to the Hue bridge, optionally replace the Dual rocker inserts with the included Single Rocker (see instructions on page 2). Adding Click to the Hue Bridge is not supported with the single rocker insert.

The light switch is compatible with standard decorator style single or multi-gang faceplates. A single gang faceplate is included.

Option B: Surface mount backplate to a flat surface using included Command Strips or with screws (not included). If using Command Strips, make pull tabs accessible through center of backplate. After the backplate is mounted, attach switch to backplate using included 3/8" backplate attachment screws. Snap on screwless faceplate.

Surface Mount

Option B: Flush mount on a standard electrical switch box using included 3/4" junction box mounting screws. If installing in place of an existing switch: turn off the power, remove the existing switch, exclude ground wires if present (usually bare wires connected to green screw) and join together all remaining wires previously connected to the old switch using the included wire nut. Do Not connect ground wires in wire nut. Cover with any faceplate that has a decorator size opening. Restore power.

Flush Mount

Add Click for Philips Hue to Hue Bridge

1. Access the Hue App for either [Apple iOS](#) or [Android Google Play](#). Update the App and Bridge (V2 or newer) to latest firmware version to ensure compatibility.
2. Tap the 'Settings' tab.
3. Tap 'Accessories'.
4. Tap 'Add accessory'.
5. Select 'Friends of Hue switch'.
6. Follow the on-screen instructions.
7. For advanced configuration options such as cycling through multiple scenes with one button, consider exploring third party apps such as HueDynamic: <http://bit.ly/HueDynamic>

Troubleshooting:

- Can't find "Friends of Hue" option in app: Upgrade to latest version
- Click for Hue won't connect to bridge: Works only with square V2 bridge or newer, not with round V1 bridge
- Switch box is recessed: search on internet for "loose outlet spacers"
- Support available at meethue.com

Instructions for using Single Rocker:

When using the single rocker insert only 2 buttons can be accessed while 4 buttons will be visible in the software. Note that the linking operation requires 4 buttons and can only be done with the dual rocker configuration. After Click is added to the bridge, the single rocker insert may be used. Storing the dual rockers is required for use in relinking or for contacting Philips for system support.

1. Remove trim piece by releasing the 4 clips on the back of the Click for Hue.
2. Pull off the Dual Rockers.
3. Snap the Single Rocker insert on so that plungers contact the LEFT side of the switch.
4. Press the trim piece into place ensuring all 4 clips are secure.

Requires a Philips Hue Bridge (v2) and Philips Hue app for Android or iOS for initial setup. Learn more on meethue.com
